

## **UNITED RECOVERY**

Did you know that motor insurers spend well in excess of **£200,000,000** every year on vehicle recovery and storage charges ?

Would you like to work for a good commercial rate for the best revenue stream our industry has ?

Have the existing management schemes/contracts jeopardised your business, demanded free services, or deducted an administration fee from your charges ?

Would you like to be fairly paid for every job that you do ?

Would you like to claim your industry back from the organisations that have constantly creamed off the profits from your hard work ?

Would you like your industry to stop pulling in so many different directions, take responsibility for itself, be self regulated, and set its own standards ?

United Recovery don't take monthly or annual subscriptions, we don't take management fees, and we don't take a percentage of your charges.

We want good professional vehicle recovery operators of high integrity, who don't do cheap recovery, but will give a quality service for a good commercial rate.

Interested ?
